

Indications

The Medtronic® Enterra® Therapy system for gastric electrical stimulation (GES) is indicated for the treatment of chronic intractable (drug refractory) nausea and vomiting secondary to gastroparesis of diabetic or idiopathic etiology in patients aged 18 to 70 years.

Clinicians, refer to the appropriate information for prescribers booklet for contraindications, warnings, precautions, adverse events summary, patient selection, and component disposal.

Patients, refer to your Medtronic Enterra patient therapy guide for contraindications, warnings, precautions, and other risk information.

Humanitarian Device: Authorized by Federal (U.S.A.) Law for use in treatment of chronic intractable (drug refractory) nausea and vomiting secondary to gastroparesis of diabetic or idiopathic etiology. The effectiveness of this device for this use has not been demonstrated.
